Summary

I am a passionate Computer Science student focused on full stack development and building solid foundations in JavaScript, Python, and Java. With hands-on experience leading development projects, I have successfully deployed responsive applications while leveraging the MERN stack.

Experience

Digital Development Intern (Lead)
Poona Panjarpole Trust 05/2025 – 07/2025

- Led a 5-member team to modernize the NGO's digital footprint.
- Architected responsive frontend using Vanilla JS and CSS.
- Managed SEO and social media to boost organic reach.

Projects

CSnotes – Academic Resource Hub
01/2026 – Present Live

- Centralized platform for engineering materials using Next.js.
- Focused on fast load times and optimized UI using Tailwind.

Instagram Reels Downloader Live

- Full-stack utility for media fetching via Express/Node.js.
